Overall Website Storyline

When designing the website, do not treat these 12 pages as 12 separate pages. They should work together to tell **one complete brand story**:

Most Important Design Principle

Brand Hierarchy	Design Direction
APIMTC	Singapore Headquarters / International Platform / MICE / Travel / Business / Professional
API EduVoyage	Chengdu China Platform / International Education Mobility / Skills / Student Exchange / China Education Resources
Global Partner Network	Schools / Universities / Vocational Institutions / Government Organisations / Companies / International Organisations
Core Programme Philosophy	Educate · Experience · Explore · Exchange (4E)
Core Brand Message	Singapore-Based · Globally Connected
Brand Story	Extending from MICE and Travel into Education, Mobility and International Exchange
Ultimate Brand Impression	APIMTC is not simply taking people somewhere. We are connecting people, places, education, industry and opportunity.
Geographic Brand Relationship	Singapore is our Home · Chengdu is our China Gateway · The World is our Network

Special Note for the Designer

The website as a whole must first and foremost make visitors feel:

“This is a Singapore-based international platform.”

It should **not** look like a “China study-tour company”, “travel agency” or “education consultancy”.

Chengdu is our China Gateway, not our corporate headquarters.

China is an important market, but **Singapore must remain the brand anchor throughout the website.**
